

Modern Data Exchange for Public Health Labs

Primary Connect integrates with a lab's existing LIMS/LIS to modernize the healthcare data exchange, enhance efficiency, and improve health outcomes

When your public health lab's success depends on efficient data exchange and rapid response capabilities, you need a reliable and comprehensive interoperability solution. Primary Connect delivers a LIMS-agnostic integration that enables public health data sharing, interoperability, and surveillance.

Benefits of Connect

Interoperability throughout Connect's Lab Network

- Seamless order routing between labs & LIMS
- Digital transfer capabilities for specialized testing needs
- Emergency preparedness through instant network access

Streamlined Service Menu Expansion

- Low cost service menu additions
- Instant deployment of new services
- Zero LIMS modification fees

Real-Time Surveillance for Public Health

- Monitor testing patterns across labs
- Support rapid outbreak response
- Pre-built and ad-hoc dashboards for insights on demand

Seamless integration with Health platform

- Digital front end for registration and ordering workflow
- Automate results delivery to patients via text/email
- Full integration with Connect to cut down on redundant manual data entry

Let's Build the Future of Interoperability Together

We're here to help! Get in touch to see how Connect can handle your data modernization needs.
